ASSISTANT SECRETARY AND COMMISSIONER OF PATENTS AND
TRADEMARKS
Washington, D.C. 20231

Paper No:19
Serial Number: 10/083669
Filing Date: February 26,2002

1. Appeal Conference 12-2-03 decided Double Patenting rejection 35 USC 101 same invention incorrect. Rejection has been withdrawn a new rejection follows.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1,55-58⁶⁶₇₁ are rejected under 35 U.S.C. 102(b) as being anticipated by Rakavy et al (5,913,040).

Rakavy et al teaches in figures 1-10, a method and apparatus for displaying information between a remote network and a local computer display device 513.

Art Unit: 2837

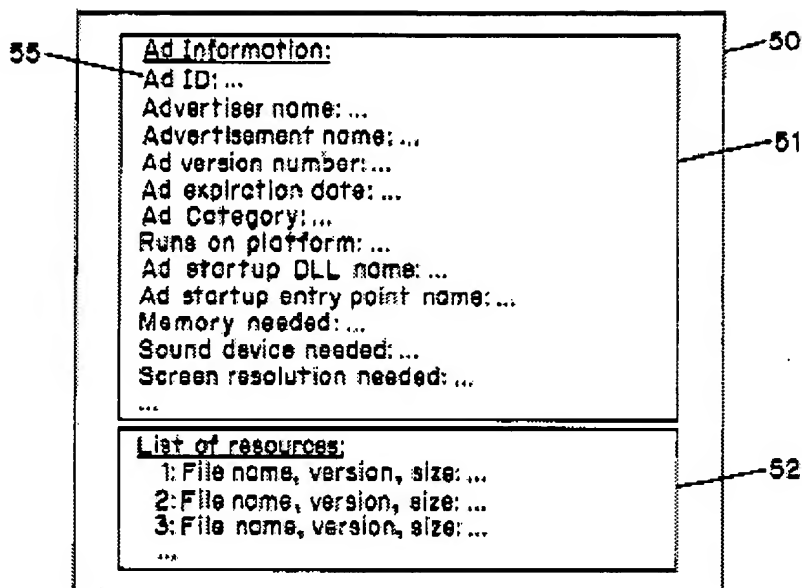

FIG. 5

1,71) Figure 5 illustrates Ad category within record 51 and source within list 52.

55) Job manager 720 matched user preferences against category information for advertisements. Manager 210 (containing scheduler 265) selects the next advertisement to be displayed. Server 600 transmits a list of advertisements.

56) Display and other presentation capabilities for each advertisement are self-contained within the advertisement itself. Col. 10, line 66.

57) User preference and configuration data may be stored on server 600 or feeder 250.

58) Available advertisements are selected from a list of available advertisements. Several sources 271 may be used. This is considered several lists.

60) LAN or local storage device 540 and feeder 250.

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

Art Unit: 2837

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 59,61-70,72 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-4,15 of U.S. Patent No. 6,349,797. Although the conflicting claims are not identical, they are not patentably distinct from each other because As stated previously, the instant invention is the same as the patent minus the limitations of the building and elevator.

6. Applicant's arguments with respect to claims 1,55-72 have been considered but are moot in view of the new ground(s) of rejection.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. McKay and Abecassis are cited to illustrate similar display systems but are not shown within an elevator environment.

8. A shortened statutory period for response to this action is set to expire 3 months from the date of this letter.

Failure to respond within the period for response will cause the application to become abandoned. 35 U.S.C. 133
